

NGUYEN MINH TRUNG

AI/ ML Engineer/ Data Scientist
0363692327 | nghetrun@gmail.com | nghetrun.github.io

CAREER OBJECTIVE

Finding a position as a Data Scientist/AI&ML Engineer at a Data-driven organization that has a well-defined data pipeline. Be able to perform analytics about sales, products, cost, profit, and customer behavior. Have a chance to build end-to-end data driven system and apply AI Engineering, LLM applications, Deep Learning models, MLOps and Cloud.

EDUCATION

University of Melbourne, Australia (03/2019 – 01/2021)

Master of Science in Data Science, Statistics and Computer Science

- Graduated with High Distinction grade, GPA 8.1

University of Sydney, Australia (03/2015 – 07/2018)

Bachelor of Computer Science and Technology

- Graduated with Distinction grade, GPA 7.9.

EXPERIENCE

VINSMART FUTURE

Data Scientist and AI Engineer

05/2026 - Present

AI Engineer

- Build Cross-sell, Content/Article, Voucher and Hotel Rate **Recommendation Systems** for Vinpearl webpage.
- **Tech stack:** Python, MongoDB, BigQuery

TECHCOMBANK

Data Scientist at Advanced Analytics Department

Hanoi, Vietnam

05/2025 - 05/2026

Data Science

- Build supervised **Segmentation** model to predict customer's segment next month
- Deploy Segmentation model on Cloud (Databrick), saving substantial effort compared to running model on-prem
- Analyze and engineer ~**100 features** with ~**300M+ records** for customer transactions, CRM and in-app behaviours data, which is the training input to the propensity model.
- Build customer **propensity** model to assign scores to each product per customer, improving conversion rates by **5%**
- Design feature engineering templates to enable data scientists to collaborate on developing and shipping features to FeatureStore

- **Tech stack:** Python, Pyspark

Optimization

- Develop and maintain **Lead Allocation** service to automate lead assignment to branch and sale, improving the process and speed of manual lead assignment by **80%**

- **Tech stack:** Java

AI Engineer

- Personalization project "Marketing AI Agent", utilizing LLM Agent to craft suitable messages in app for each customer based on their behaviours.
- Build POC for Travel AI Agent to acquire new Merchants for bank, using LangGraph and RAG techniques.

VIETTEL AI

Machine Learning Engineer

Hanoi, Vietnam

12/2022 – 04/2025

Data Analytics

- Perform **K-mean segmentation** to understand user video watching behaviours
- Clean and prepare **1M+** log data
- Perform **A/B testing** strategy to measure the performance of the recommendation system by collecting user clickstream data, identifying an increase of **6%** in Click-through-rate.
- Build Kedro pipeline and MLflow for Machine Learning
- **Tech stack:** Python, Clickhouse, MLflow

Deployment

- Design pipeline to **migrate** recommendation system from on-prem to Kubernetes clusters
- **Deploy end-to-end** the Recommendation System including data ingestion, data storage, scheduled model training batch jobs, API server to Kubernetes
- Setup Prometheus and Grafana for performance **monitoring**
- **Tech stack:** Kubernetes, Kafka, PostgreSQL, Redis, Airflow, FastAPI, ArgoCD

BIDV – Bank for Investment and Development of Vietnam

Data Analyst at Digital Banking Center

Hanoi, Vietnam

03/2021 – 11/2022

- Perform data cleaning and transformation to prepare data as input for the model using Python and PySpark
- Using SQL to query, and prepare data for further analytical tasks
- Analyze and build a Machine Learning model to get insights into Customer churn behavior
- Design and build analytic dashboards to provide information for the business team (Tableau)
- Perform customer segmentation analysis using RFM
- **Tech stack:** Python, Pyspark, SQL, Tableau

TECHNICAL SKILLS

Programming: SQL, Python and R for Data Analysis and Modelling

Machine Learning: Sk-learn, PyTorch, Keras, PySpark

Data Pipeline: Apache Airflow, PostgreSQL, Redis, Milvus, MinIO, Kafka

BI Tools: Tableau, PowerBI, Superset

MLOps: Kubernetes, Docker, MLFlow, SeldonCore, Google Cloud Platform
